

## POWER BI & ANALYTICS CONSULTANT.

Hybrid - Full-time.  
London & Suffolk.

### Essential/Mandatory

Must have the right to work in the UK and be eligible to meet client security and onboarding requirements where applicable.

## Role overview.

We are open to applications from developing, experienced, and senior Power BI professionals. The level of responsibility and remuneration will be aligned to the successful candidate's experience, capability, and contribution. **We value technical capability, curiosity, problem-solving skills, and a willingness to learn as much as years of experience.**

Experience delivering analytics and reporting solutions using Power BI, either within consultancy, project delivery, programme environments, or equivalent commercial settings. We welcome applications from candidates at different stages of their careers who can demonstrate relevant skills and capability.

**th3rdcurve is seeking Power BI & Analytics Consultants (Junior, Mid and Senior level consultants considered) to support the delivery of high-quality reporting and analytics solutions across a range of client programmes and projects.**

Working as part of our consulting team, you will contribute to the development and assurance of programme, project, and board-level reporting, supporting clients in gaining clear, accurate, and timely insights to inform critical decision-making. The role will involve close collaboration with Project Controls, Programme Management, and senior client stakeholders, ensuring that reporting solutions are aligned with governance frameworks and best practices.

### Key Responsibilities:

- Design, develop, and maintain Power BI dashboards and reports to support programme and project performance reporting, including executive and Board-level views
- Work alongside client teams and internal consultants to understand reporting requirements and translate these into effective, fit-for-purpose analytics solutions
- Work collaboratively within a reporting team to ensure consistency, accuracy, and strong data governance
- Support the consistent application of reporting standards, data governance, and best practices, ensuring accuracy and reliability of information

- Provide technical input and advice to clients and colleagues on data visualisation, analytics approaches, and reporting strategy
- Contribute to the continuous improvement of reporting and analytics capability across client engagements
- Support colleagues, sharing knowledge and contributing to the development of th3rdcurve's analytics offering

### Knowledge, Skills & Experience:

#### ESSENTIAL:

- Proven experience developing reports and dashboards using Power BI
- Understanding of data modelling and data visualisation principles.
- Strong communication and stakeholder engagement skills.
- Ability to analyse and present information clearly.
- Organised and able to manage competing priorities.
- Commitment to quality and continuous improvement.

#### DESIRABLE:

- Experience within Project Controls, PMO, or programme environments.
- Consultancy or client-facing experience.
- Power Apps, Power Automate, Fabric, Azure, or wider Microsoft Power Platform experience.
- Experience producing executive or Board-level reporting.
- Exposure to Microsoft Fabric, Power Platform, Azure Data Services, SQL, or similar technologies would be advantageous

## About us:

th3rdcurve are a London-based consultancy delivering high-impact services in project controls and digital transformation. Our clients come from a range of sectors, including rail, infrastructure, utilities (water, oil, gas, electric, renewables and nuclear), construction and government. We are known for our collaborative, values-driven and future-focused approach.

We care deeply about our impact and bring that same mindset to our internal team.

Our commitment to our clients is based on trust, expertise and our unwavering focus to ensure positive results.

## Who You Are:

**You bring more than just project control skills—you bring the right behaviours that align with how we show up every day:**

- You really care about helping others succeed.
- You proactively look for ways to add value, even when it's not explicitly asked.
- You're a critical thinker who asks smart questions and seeks to understand before acting.
- You're digitally literate, adaptable, and comfortable working with modern tools.
- You're curious, proactive, and always looking to improve.
- You're credible, authentic, and can influence others with integrity.
- You're emotionally intelligent, self-aware, and respectful in how you show up.
- You bring innovative thinking and don't default to the obvious.
- You focus on results and optimisation, not just activity.
- You're collaborative—you don't sit in silence, and you make space for others.
- You're accountable and own your outcomes.
- You balance resilience with compassion—kindness matters here.
- You're the kind of person who likes to go above and beyond.

## Why Join Us?

- Work with major clients across complex programmes and projects.
- Gain exposure to senior stakeholders and executive reporting.
- Opportunity to shape and grow our analytics capability.
- Flexible hybrid working environment.
- Continuous professional development and training support.
- Opportunity to develop skills across Power BI, Power Apps, AI, Project Controls, and wider Microsoft technologies.

Our values are at the heart of who, and how we work – they shape our environment and daily interactions.

## Our values.

Our values create a work environment that is rich in empathy, creativity and diversity. All contributions are actively welcomed and explored.

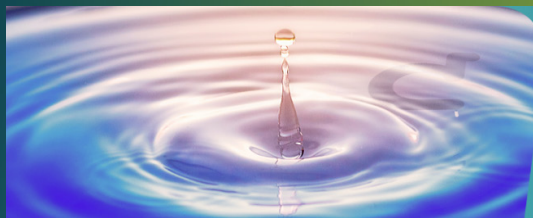

### Creativity

Be creative when the basics don't work, be inventive when facing the unexpected and be agile when things don't go to plan.

### Impact

Be driven to make a difference, to lead others forward and leave a lasting legacy of positive impact.

### Love

Love what you do, love who you do it with and most of all love life.

### Individuality

Don't sacrifice your identity to try and fit in, speak your language and share your perspective, be happy being yourself.

### Courage

Have the courage to stand up for what you believe in, the courage to speak up and the courage to do the right thing.

Upload/attach your CV if you think this could be a great fit for your skills, values & career aspirations.
