

PROJECT CONTROLS PLANNER.

Hybrid - Full-time.
London & Suffolk.

Essential/Mandatory

At least 2+ years experience
in project controls planning.

Role overview.

Support the successful delivery of projects and programmes through the development, maintenance and coordination of project schedules and planning activities.

Working alongside the Planning Lead and wider project delivery teams, the Planner will support programme development, progress monitoring, reporting and schedule analysis to help ensure projects are delivered safely, efficiently and in line with key milestones and objectives.

We are seeking a **full-time Project Controls Planner** to join our team in a hybrid role based in London & Suffolk, (with travel as required and some flexibility for home-working).

Key Responsibilities:

- Support the development, maintenance and updating of integrated master and short-term project programmes
- Assist in coordinating contractor schedules and ensuring alignment with the overall programme
- Support the development of logical construction sequences and delivery methodologies
- Monitor project progress and maintain accurate programme updates
- Produce schedule reports, progress updates and planning information for project stakeholders
- Support analysis of programme impacts, risks, trends and potential delays
- Liaise with site teams, engineering disciplines and supply chain partners to gather progress information and resolve scheduling issues
- Assist with resource planning and coordination across multidisciplinary teams
- Maintain accurate schedule information using Primavera P6 and associated planning tools
- Support programme governance, reporting and project controls activities
- Contribute to the continuous improvement of planning standards, processes

- Work collaboratively with engineering, construction and project controls teams to support successful project delivery

Knowledge, Skills & Experience:

ESSENTIAL:

- Experience working as a Planner within construction, infrastructure or engineering projects
- Working knowledge of Primavera P6
- Understanding of construction sequencing and project delivery principles
- Experience supporting project schedules within multi-disciplinary project environments
- Strong communication and stakeholder coordination skills
- Good analytical and problem-solving abilities
- Ability to work effectively within fast-paced project environments
- High attention to detail and strong organisational skills
- Proficiency in Microsoft Office applications, including Excel
- Degree, HNC/HND or recognised qualification in engineering, construction management or a related discipline, or equivalent practical experience

DESIRABLE:

- Experience working on major infrastructure or highly regulated projects
- Familiarity with schedule analysis and assurance tools such as Acumen Fuse
- Experience using 4D planning tools such as Synchro
- Knowledge of Power BI or other reporting and data visualisation tools
- Understanding of project controls processes, reporting and performance measurement

About us:

th3rdcurve are a London-based consultancy delivering high-impact services in project controls and digital transformation. Our clients come from a range of sectors, including rail, infrastructure, utilities (water, oil, gas, electric, renewables and nuclear), construction and government. We are known for our collaborative, values-driven and future-focused approach.

We care deeply about our impact and bring that same mindset to our internal team.

Our commitment to our clients is based on trust, expertise and our unwavering focus to ensure positive results.

Who You Are:

You bring more than just project control skills—you bring the right behaviours that align with how we show up every day:

- You really care about helping others succeed
- You proactively look for ways to add value, even when it's not explicitly asked
- You're a critical thinker who asks smart questions and seeks to understand before acting
- You're digitally literate, adaptable, and comfortable working with modern tools
- You're curious, proactive, and always looking to improve
- You're credible, authentic, and can influence others with integrity
- You're emotionally intelligent, self-aware, and respectful in how you show up
- You bring innovative thinking and don't default to the obvious
- You focus on results and optimisation, not just activity
- You're collaborative—you don't sit in silence, and you make space for others
- You're accountable and own your outcomes
- You balance resilience with compassion—kindness matters here
- You're the kind of person who likes to go above and beyond

Why Join Us?

- Be part of a values-led consultancy where you're not just a number
- Work closely with experienced consultants and leaders invested in your development
- Shape the way we grow and influence how we build our teams
- Hybrid working and flexibility
- Exposure to cutting-edge work in project controls and digital transformation
- A down-to-earth, high-performing culture that genuinely supports its people

Our values are at the heart of who, and how we work – they shape our environment and daily interactions.

Our values.

Our values create a work environment that is rich in empathy, creativity and diversity. All contributions are actively welcomed and explored.

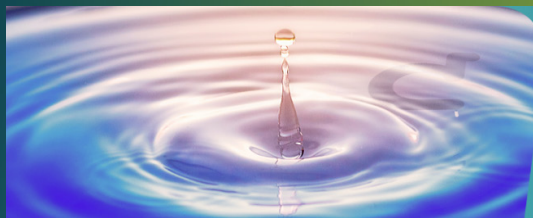

Creativity

Be creative when the basics don't work, be inventive when facing the unexpected and be agile when things don't go to plan.

Impact

Be driven to make a difference, to lead others forward and leave a lasting legacy of positive impact.

Love

Love what you do, love who you do it with and most of all love life.

Individuality

Don't sacrifice your identity to try and fit in, speak your language and share your perspective, be happy being yourself.

Courage

Have the courage to stand up for what you believe in, the courage to speak up and the courage to do the right thing.

Upload/attach your CV if you think this could be a great fit for your skills, values & career aspirations.
