

PROJECT CONTROLS MANAGER.

Hybrid - Full-time.
London & Suffolk.

ESSENTIAL/MANDATORY

Experience of working within more than one of the Project Controls Functions of: cost control, estimating, scheduling, change management and risk.

Role overview.

We are seeking a **full-time Project Controls Manager** to join our team in a hybrid role based in London & Suffolk (with travel as required), with the flexibility for some work-from-home arrangements.

The candidate should have experience of working on a large-scale project environment and they will have experience of working in multiple Project Controls functions and understand how integrated Project Controls management information is achieved. This knowledge and their previous experience on major programmes and projects will enable them to assure and challenge outputs produced by the various project controls functions. They will be able to write and edit reporting narrative, so that reports all have a consistent style, and the narrative answers the 'So What?' question for Managers and Leadership.

They will have experience of working with the supply chain, multi discipline teams and senior leadership to ensure that Project Controls activities are carried out effectively. They will also be comfortable to run month end Performance Reviews for their scope or cover the month end reviews for the Programme Controls Managers when required. They should be able to demonstrate their ability to handle multiple Project Controls activities, tasks or one of exercises that might be asked of them and ensure they can prioritize these for successful delivery.

Key Responsibilities:

- **Responsible for either the complete Project Controls activities for a discrete area of scope or supporting Programme Controls Managers in the wider delivery of Project Controls activities.**
- **Responsible for liaising with the supply chain and the assurance of their Project Controls information**
- **Co-ordination of Project Controls Functions to ensure the delivery of integrated Project Controls management information.**
- **To support the Programme Controls Manager with progress reporting including schedule updates, forecast to complete, variance identification and opportunities for improvement.**
- **Accountable for the on-time production and quality of month end Performance Reports**
- **Help ensure th3rdcurve is viewed by the Construction Industry as an exemplar in Project Controls through knowledge sharing, networking and delivering presentations to the sector**
- **Management of senior stakeholders related to the scope**

Line Management Responsibilities:

Dependant on scope of work and delegations. Initially there will be no Direct Reports but up to 5 functionally which cover (cost, schedule, risk, change and reporting) where required. Dependant on development Direct Line management may become a requirement at a future date.

Experience, Knowledge, & Qualifications

ESSENTIAL

- Degree or equivalent qualification in business analysis, accounting, finance, construction, engineering or project management, or related technical field.
- A track record of working as a Project Controls Engineer or Manager on large and complex infrastructure projects.
- Experience of working within more than one of the Project Controls Functions of: cost control, estimating, scheduling, change management and risk management.
- Detailed understanding of earned value analysis.
- Experience of successfully managing a team in a matrix structure on a project.
- Experience with increasing responsibility showing an ability to manage senior stakeholders.
- Deliverables focused and an accomplished problem solver, rising to meet any challenge.
- Excellent presentation, influencing and facilitation skills.
- Exceptional interpersonal and communication skills.

DESIRABLE

- Active membership of AACE, PMI, APM or similar association with association certifications.
- User of a range of reporting and analytics software and project controls systems particularly Power BI.
- Understanding of various contract types, in particular the NEC suite and FIDIC.
- Experience in the Nuclear sector.

About us:

th3rdcurve are a London-based consultancy delivering high-impact services in project controls and digital transformation. Our clients come from a range of sectors, including rail, infrastructure, utilities (water, oil, gas, electric, renewables and nuclear), construction and government. We are known for our collaborative, values-driven and future-focused approach.

We care deeply about our impact and bring that same mindset to our internal team.

We are expanding quickly and looking for people who want to grow with us.

Our commitment to our clients is based on trust, expertise and our unwavering focus to ensure positive results.

Who You Are:

You bring more than just project control skills—you bring the right behaviours that align with how we show up every day:

- You really care about helping others succeed
- You proactively look for ways to add value, even when it's not explicitly asked
- You're a critical thinker who asks smart questions and seeks to understand before acting
- You're digitally literate, adaptable, and comfortable working with modern tools
- You're curious, proactive, and always looking to improve
- You're credible, authentic, and can influence others with integrity
- You're emotionally intelligent, self-aware, and respectful in how you show up
- You bring innovative thinking and don't default to the obvious
- You focus on results and optimisation, not just activity
- You're collaborative—you don't sit in silence, and you make space for others
- You're accountable and own your outcomes
- You balance resilience with compassion—kindness matters here
- You're the kind of person who likes to go above and beyond

Why Join Us?

- Be part of a values-led consultancy where you're not just a number
- Work closely with experienced consultants and leaders invested in your development
- Shape the way we grow and influence how we build our teams
- Hybrid working and flexibility
- Exposure to cutting-edge work in project controls and digital transformation
- A down-to-earth, high-performing culture that genuinely supports its people

Our values are at the heart of who, and how we work – they shape our environment and daily interactions.

Our values.

Our values create a work environment that is rich in empathy, creativity and diversity. All contributions are actively welcomed and explored.

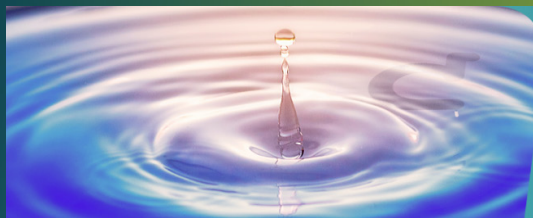

Creativity

Be creative when the basics don't work, be inventive when facing the unexpected and be agile when things don't go to plan.

Impact

Be driven to make a difference, to lead others forward and leave a lasting legacy of positive impact.

Love

Love what you do, love who you do it with and most of all love life.

Individuality

Don't sacrifice your identity to try and fit in, speak your language and share your perspective, be happy being yourself.

Courage

Have the courage to stand up for what you believe in, the courage to speak up and the courage to do the right thing.

Upload/attach your CV if you think this could be a great fit for your skills, values & career aspirations.
